

# Lab Assignment 2

Due Date: **October 02, 2025**

Points: 10

Submission Type: File Upload (**only doc and zip file**)

## Important Note:

The homework assignment is due at the end of the day on **Thursday, October 02**.

Please attempt to solve the assignment problems yourself and obey the academic honesty and integrity policies of the university. It is acceptable to discuss the problems with the classmates, but it is not acceptable to get access to the solutions from the classmates. Obviously, it is not acceptable to copy and paste solutions to the assignment problems from solutions by coding assistants, from webpages, or anywhere else.

Please be aware of the deadline. Unless you notify me of an emergency, you will receive 0 if you miss the deadline. You must upload your work to Canvas. Please refrain from emailing your submissions. Any inquiries? Send me an email, please. Contact information: [mrahman@uidaho.edu](mailto:mrahman@uidaho.edu)

## Deliverable:

1. A word doc file where you have to include all of the page's screenshots of your work. For example: Screenshot of Home page, About page etc. In this doc file (last page), please also include your live website link. To create a live website link, create a GitHub account and upload your work there and publish it. You can take help from <https://progate.com/docs/github-pages>. You also can search google to get more help.

\*\*Only doc file is allowed, no other file formats are allowed and acceptable.

A zip file where your source code could be found.

## Task:

Build a portfolio/personal website. Please look at the sample portfolio page below but you can design your one what you like.

**Your personal website should include at least:**

- **Header Menu:** Home, About, Portfolio, Contact (form and Map), Sign in (form), Signup (form).
- **Footer Menu:** Terms and Conditions, Privacy Policy, Cookie Policy.
- Google Map in contact page. You can get the embed html code from here:  
<https://google-map-generator.com>

**Note:** Each menu should be attached with different html pages. For example: “Home menu” will be linked with index.html page, “About” menu will be linked with about.html page. Each html page should contain at least 2-3 paragraph contents, and each content should contain at least 50-100 words. Also, in each html page you should use at least 10 tags from: <https://www.w3schools.com/tags/>. Also remember that if you are in “About page” then “About” link(menu) should be highlighted so that user can understand where he/she is.
